## 7. SUMMARY OF INDUSTRIAL DEVELOPMENT.

In 1922 the Government started a system of granting bonuses to plantation owners for all young clove trees planted. Before being eligible for this bonus, certain conditions have to be observed with regard to the planting, and all such trees have to be examined and passed as being suitable by Government Officers.

Though this scheme led to considerable planting of young trees in both islands, the system is not suitable for the regeneration of the plantations. It has been discontinued for plantings after 1926.

Also in 1922 the Government introduced a system of bonuses for bearing clove trees, with the object of enabling plantation owners, who were heavily indebted to money-lenders, to have the cash wherewith to clean their plantations. This is also having a very beneficial effect in increasing the production of the plantations.

The clove producers have now been organized into an association styled the Zanzibar and Pemba Clove Growers' Association. This was primarily formed to reduce the high rates paid in recent years for the picking of cloves, and at the same time ensure that uniform rates were paid. The scope of the association was extended during the latter part of 1927 to include co-operative transport and marketing of cloves, which was carried on experimentally during the months of November and December.

The Director of Agriculture is President, and the Senior Commissioner, Zanzibar, and the District Commissioner, Pemba, are Vice-Presidents of the Association. District Committees have been formed and the chairmen of the committees form the Council of the Association.

THESE QUESTIONS ARE TO BE FILLED UP IN RESPECT OF  
EACH PRISON IN THE PROTECTORATE.

1927.

QUESTIONS.

I. If the prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

III. How many cells are there; and how many associated wards?

IV. Taking the *average* number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

And what superficial area?

V. How are the prisoners classified?

VI. Is penal labour—that is, labour by treadmill, crank, or shot drill—in force?

VII. If so, during what periods of imprisonments in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, etc., secondly, the length of spells and intervals of rest.

VIII. What kind of labour, other than penal labour, is in use?

IX. If the prisoners are employed beyond the walls of the gaol, state:—

1. On what kind of work they are so employed.

2. How are they supervised?

3. How many escapes of prisoners, while being employed beyond the gaol, have taken place during each of the last three years?

4. How the profits of their labour are accounted for?

X. What was the total annual cost of the prison during the year 1926?

XI. What was the annual amount of the prisoners' earnings during 1926?

XII. What is the number of the hours allotted for sleep? And, if sleep is in association, are the dormitories lighted? and how often are they patrolled during the night?

ANSWERS.

Not on separate system. Prisoners work in association under guard and sleep in association with a Sentry patrolling outside the cells at night.

Supervised by Sentries relieved every 3 hours.
